TM-153

Vertical Form-Fill-Seal Machine

TAM TM153

Flexibility to suit the Basic Machine Features to clients' specifications and needs

To widen the scope of each customer's needs, the TM153 offers a user-selectable combination of basic machine features: film feeding (w/ vacuum or w/friction) and horizontal seal drivers with servo driving.

Improved Basic Features

Combining vacuum belts for film feeding and horizontal seal controlled with servo motor achieved a significant improvement in the performance of the machine, guaranteeing stable film feeding and high-quality seals are guaranteed. The running speed has been increased up to 100 bags/minute (max).

Better Maintenance and Operability

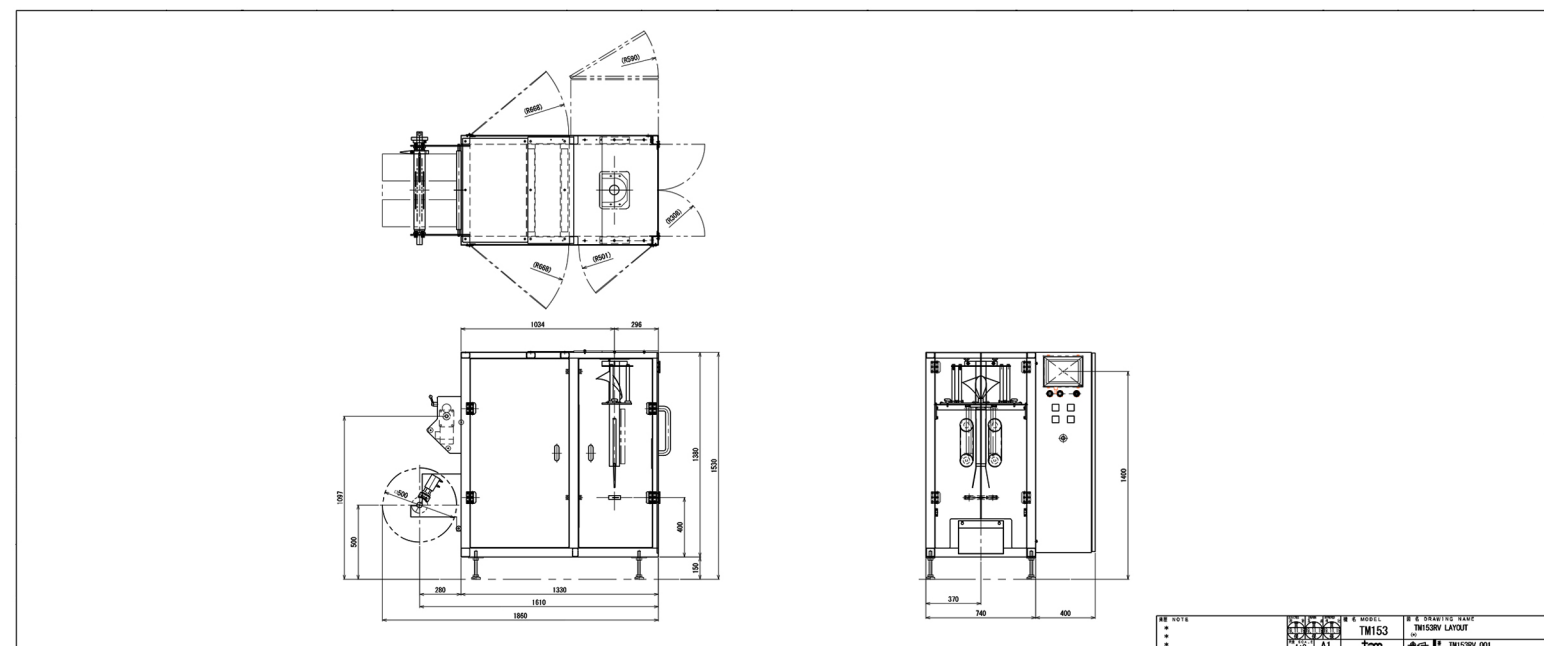

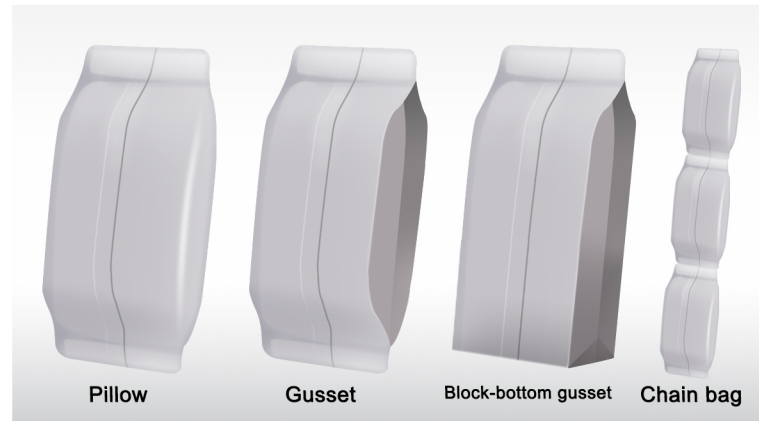

The skeleton cover has greatly improved the visibility inside the machine and makes maintenance much more accessible. In addition, the film reel is now located on the outside of the frame, enabling users to change film rolls quicker and easier.

Simple Operation

Featuring a large, 10-inch color touch panel, the TM153 is now even simpler, faster and easier to operate.

Specifications

Package Range	Bag width: 50mm-230mm/ Bag length: 80mm-350mm
Filling Speed	100 bags/min (max)
Machine Weight	600kg
Power Consumption	3 phase AC380V
	- Auger filler
	- Gas flushing device
	- Punch hole mechanism
	- Various types of printers
	- and others

Specifications are subject to change without notice due to technical improvement or modifications.
